

Jorge Jacome

Staff / Principal Frontend Engineer | Applied AI

jorgejac97@gmail.com · jjacome.com · LinkedIn · GitHub

15+ years in frontend and platform engineering, with experience at Oracle, ESPN / Disney and American Express.

PROFESSIONAL EXPERIENCE

Oracle

Principal Member of Technical Staff | 01/2026 - Present

- Provide technical direction, mentoring, code review and cross-team delivery for Oracle's EHR Messaging Center.
- Authored an AI engineering playbook and delivered Codex training for coding, testing and documentation.
- Developed and delivered practical AI training covering AI fundamentals, prompt design, API integration, agent workflows and engineering best practices.
- Re-architected E2E test automation using AI-assisted development.

ESPN / Disney

Lead Software Engineer | 08/2024 - 01/2026

- Led sportsbook feature delivery using React, TypeScript and Node.js with Product, Design and engineering partners.
- Contributed component injection, routes, context providers and React Server Components rendering to the shared web platform.
- Built and maintained reusable platform libraries and contributed performance improvements.
- Mentored engineers on modern React, TypeScript and testing practices.

American Express

Senior Engineer II | 12/2018 - 07/2024

- Developed 30+ customer-facing React components across cardmember dashboard and savings/checking products.
- Reduced dashboard load time by four seconds through SSR and frontend optimization.
- Mentored 10+ engineers through feedback, technical guidance and growth conversations.
- Led feature delivery and partnered with Product and Design on scope, planning and release coordination.

Engineer I | 09/2017 - 12/2018

- Built and maintained React interfaces and reusable components for cardmember experiences.
- Contributed testing, delivery coordination and production maintenance.

Engineer II | 09/2015 - 09/2017

- Contributed to the cardmember platform migration and customer-facing frontend features.
- Worked on dashboard rendering, API integration and production support.

Jorge Jacome

Earlier experience, independent work and capabilities

EARLIER EXPERIENCE

iGATE | Java UI Developer | 11/2014 - 09/2015

Created internal websites for company vendors providing product and service information.

Systems USA | Java UI Developer | 01/2013 - 10/2014

Led frontend development for the Virginia Case Management System as a Deloitte consultant.

Softtek | Java UI Developer | 01/2011 - 12/2012

Developed Java applications and web interfaces for GE Treasury.

Radycal Systems | Web Developer | 10/2010 - 12/2011

Led development of a school management platform using PHP, AJAX, JavaScript, HTML and MySQL.

Nettours | Web Developer | 11/2009 - 10/2010

Developed booking website and workflows for Nettours, enhancing online experience for customers.

INDEPENDENT ENGINEERING

AllyLab: An accessibility review workflow across a React dashboard, API and CLI, with a companion Next.js website.

github.com/jorgejac1/allylab

Conductor: Tracks, dependencies and task-specific context make parallel agent work easier to inspect before execution.

github.com/jorgejac1/conductor-agents

Evalgate: Markdown work contracts connect acceptance criteria to executable checks and visible results.

github.com/jorgejac1/evalgate

Private RAG work combines embeddings, scoped retrieval, structured generation, streaming and citations. Public explanations use synthetic data.

CAPABILITIES

Frontend architecture: React, Next.js, TypeScript, JavaScript, HTML & CSS, SSR & React Server Components

Engineering quality: Accessibility review, Performance analysis, Unit & integration testing, E2E automation, API boundaries

Applied AI & leadership: LLM API integration, Retrieval with citations, Agent orchestration, Executable acceptance checks, Technical direction & mentoring

EDUCATION, RECOGNITION & LANGUAGES

Bachelor's Degree, Systems Engineering | ITESO | 2004-2010

Chairman's Award | American Express | 02/2018

Spanish (native) · English (fluent) · Portuguese (intermediate) · French (intermediate)
